

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (Currently Amended) ~~Rack~~A rack, in particular for cable television, having a number of modules whose inputs and outputs are connected to cables for the transmission of radio frequency signals and control signals, modules being connected via the common inputs and outputs by coaxial cables which carry both radio frequency signals and coded control signals.
2. (Currently Amended) ~~Rack~~The rack according to Claim 1, wherein a DC voltage ~~being~~is used for the control signals and ~~that~~ the control signals are added to the radio frequency signals by means of frequency-division multiplex.
3. (Currently Amended) ~~Rack~~The rack according to Claim 1, the control signals being coded by different DC voltage levels.
4. (Currently Amended) ~~Rack~~The rack according to Claim 1, the modules ~~contain~~containing circuits for coding the control signals.

5. (Currently Amended) ~~Rack~~The rack according to Claim 1, the modules containing circuits which combine the radio frequency signals and the control signals, so that these are fed via common inputs and outputs.

6. (Currently Amended) ~~Rack according to Claims 1~~The rack according to Claim 1, the control signals being routed via the inner conductor of the coaxial cable.
